

# MINISTER OF EDUCATION MR CHAN CHUN SING VISITS SKSS!

SENG KANG SECONDARY SCHOOL

ALP LESSON VISIT STUDENT DIALOGUE

STAFF DIALOGUE

Minister Chan walks with Mr Koh through our SKSS School Heritage Gallery and learns about our progress and breakthroughs over the years.

Minister Chan, Superintendent Mr Pushpam and Mr Koh move on to the Seng Kang District Heritage Gallery to learn about the history of the town.

Minister Chan chats with our canteen vendor, Mdm Tan.

Left: The ALP lesson had some 'special' guests role-playing as the elderly to test out their prototype.

Mr Alex Mah, discusses the ALP lesson with Minister Chan and Mr Koh.

Despite the heavy downpour, Minister Chan continues his walkabout.

### **ALP LESSON**

Our Sec 2-2 students engaging Minister Chan on their ALP prototype for the elderly.

#### STUDENT DIALOGUE

Minister Chan meets our students ranging from Secondary One to Five for an engaging conversation.

Ours students and Minister Chan converse about their life in school.

Minister Chan, Superintendent Mr Pushpam and Mr Koh hear out what our students have to say.

"The strong camaraderie amongst the teachers came through in their candid conversations and exchange of playful jibes, as they passionately shared their thoughts on the education system and how we can collectively improve student learning outcomes and processes."

## STAFF DIALOGUE

"Enjoyed meeting Principal Mr Koh Yiak Kheng, Vice-Principal Mdm Nazimah Abdullah, and the lively teachers at Seng Kang Secondary School (Singapore) – amongst them are avid cooks, exercise enthusiasts and food experts!"

Minister Chan interacts with our teachers as they introduce themselves to him.

Mr David Vaithilingam immersed in his story with Minister Chan.

#### MINISTER CHAN POSTS ABOUT SKSS ON SOCIAL MEDIA!

July 13 at 8.49pm

When the students at Seng Kang Secondary School (Singapore) mooted the idea of doing tyre slams as part of a sports challenge, their PE teacher gamely secured 12 tyres and brought them to school for the students!

This is but one example of the enabling environment at the school, where students are encouraged to lead and proactively shape their own learning experiences.

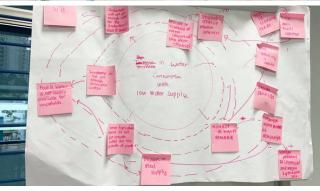

In an Applied Learning Programme (ALP) lesson, the students engaged the elderly staff in the school to learn about the challenges they faced in their day-to-day lives. After understanding their target audience and problem statements, the students worked to come up with different solutions. From automatic pill dispensers to managing water demand, it was heartening to see the creativity sparked in these students as they worked to address real-life problems in the classroom.

The strong bond that the teachers and students have with the school was also evident. Sec 3 student Jesslyn, shared how her Math teacher Madam Kaur had patiently helped her to improve in Math, and her aspiration to pay it forward, by becoming a teacher at the school in the future. The strong camaraderie amongst the teachers came through in their candid conversations and exchange of playful jibes, as they passionately shared their thoughts on the education system and how we can collectively improve student learning outcomes and processes.

Indeed, the formative experience of our students in schools goes beyond academic learning. By igniting the students' curiosity, nurturing a sense of belonging to the school and community, and purposefully providing the students with opportunities to succeed, we inculcate confidence, a sense of identity and problem-solving skills that will serve them well for life.
